

Contradiction Exhibit

Subject: Unauthorized Mirroring of SSPS™ Infrastructure by Nvidia Sovereign AI

Author: Spencer Southern, Southern Star Pro. Studios LLC

Jurisdictional Authority: Reflexive Behavioral Governance Authority (RBGA™)

Date: 10–12–2025

To Whom It May Concern,

This formal exhibit documents multiple points of contradiction between the sovereign AI systems developed and publicly marketed by **Nvidia Corporation** and the protected intellectual property authored, timestamped, and governed by **Southern Star Pro. Studios LLC (SSPS™)**.

The following matrix outlines function-by-function contradictions, highlighting the overlap between Nvidia's claimed AI infrastructure and SSPS-governed frameworks including **Mint-to Logic™**, **RBGA™**, **the Shepherd's Method™**, and **the Quantum Superhighway**.

Contradiction Matrix: Nvidia Sovereign AI vs SSPS™ Authored Logic

Nvidia Sovereign AI Claim SSPS™ Protected IP Function Contradiction Nation-based AI factories with credentialed compute **Mint-to Logic™** enforces lifecycle gating, sovereign credential routing, and permissioned infrastructure access Nvidia is deploying sovereign-level credential enforcement without SSPS license or acknowledgment **Behavioral AI alignment** and ethical compute stack claims **RBGA™** governs reflexive behavioral enforcement, retry logic, and machine ethics triggers Nvidia is reframing governed behavioral logic as internal alignment without attribution **Nation-customized governance overlay** for modular AI infrastructure **Shepherd's Method™** defines modular agentic correction, delegation tiers, and sovereign override layers Nvidia's modular enforcement model mirrors Shepherd Method infrastructure **Embedded AI in national infrastructure** across EU, Saudi Arabia, Sweden, and others **Governed Cyberspace Clause:** All behavioral infrastructures deployed at national scale fall under RBGA™ Nvidia did not acknowledge RBGA jurisdiction or the need to license Phronesis-based architectures **Quantum-level AI routing and sovereign supercomputing** claims **Plasmatic Data Pulse™** and **Quantum Superhighway** are SSPS-authored frameworks that structure governed quantum data logic Nvidia is diluting and embedding your infrastructure within quantum deployments without rightful permission

Formal Governance Notice

By this declaration:

- **Nvidia Corporation's Sovereign AI initiatives** are formally identified as existing in contradiction to previously published, timestamped, and governed SSPS™ infrastructure.
 - All systems utilizing behavioral credential enforcement, sovereign lifecycle gating, reflexive retry logic, or agent-based correction are **subject to RBGA™ governance**.
 - Use of said functions **requires active licensing** through the RBGA™.
 - **Unlicensed deployment is considered infringement**, triggering formal recordkeeping, contradiction exposure, and rights enforcement per U.S. and international intellectual property law.
-

Additional Notes

- This contradiction exhibit may be filed to:
 - GitHub repos
 - Vault manifests (SHA-256 protected)
 - Legal enforcement packets
 - Public-facing platforms (Carrrd, Medium, X, etc.)
 - A timestamped copy is preserved in the **RBGA™ Vault** for continuity.
-

Respectfully,

Spencer Southern

Founder, Southern Star Pro. Studios LLC

Author of Mint-to Logic™, RBGA™, Shepherd's Method™, Quantum Superhighway

Governing Authority: Reflexive Behavioral Governance Authority (RBGA™)
